

CSDS Conference Song - by Kiki Schippers

Who am I to tell you who you are and how you're supposed to act
Consider that
Consider that
Who am I to judge perspectives whenever I object
Consider that
Consider that
Because the humble answer always is: interact

It's been a journey
It's been a guide
And just like Bernie sometimes I just watched from different eyes
Throughout the rough times
Throughout the globe
I know they're tough times
But we can't throw out our hope

If we keep trying
If we keep listening
Just keep wondering 'bout the ones that never share
We'll be transforming
for a better future
But don't be afraid it's a long road getting there

So open up your institute
and open up your brain
Learning can save lives
it's the most powerful drive
let knowledge spread like COVID
take a deep breath and a dive
Choose humility over vain

**Can we innovate for losses
should we teach for emergencies
Can we learn the art of losing
developing from injuries?**

**Can you slow down on your ethics
In a moral way of growth
If sustainable don't enrich us
How can we do both?**

**It's a fossile way of thinking
that we're powered by our fees
maybe we should teach emergencies**

Education never stops
It will fail without the willing of a failure
We need trails there

If our teaching is colonized by prosperity and effectivity
How can we progress freely?
If we keep on expecting growth
if borders are our guides
We're only building walls
And digging trenches from both sides

Is a movement social if it's not allowed to change?
Are we open for enduring exchange?
If inclusiveness is also excluding in a way
How to keep everyone okay?

**Can we innovate for losses
should we teach for emergencies
Can we learn the art of losing
developing from injuries?**

**Can you slow down on your ethics
In a moral way of growth
If sustainable don't enrich us
How can we do both?**

**It's a fossil way of thinking
that we're powered by our fees
maybe we should teach emergencies**

what's developing from injuries?
are we better off with rules?
use your reimagination
reinvent our labs and schools

if we develop less authority
and let others lead the way
equality will answer
and guide us day by day

sensible and vulnerable
in putting up your teams
reach out for another
they may help you build your dreams

less fastfood of high ratings
set your incentives free
aim high and do it playful
so sing along with me...

Can we innovate for losses

should we teach for emergencies
Can we learn the art of losing
developing from injuries?

Can you slow down on your ethics
In a moral way of growth
If sustainable don't enrich us
How can we do both?

It's a fossil way of thinking
that we're powered by our fees
maybe we should teach emergencies
maybe we should teach emergencies
